

Bucket Fillers, That's Who We Are

We all have a bucket where we keep our love and light
When it's full we're happy and our eyes are shining bright
When we fill others' buckets it always feels so good
Seeing smiling faces walking 'round the neighborhood

Bucket Filling, that's what we do here

Bucket Fillers, that's who we are (*that's who we are!*)

When a bucket needs some filling

A kind word and a helping hand's... a perfect way to start

When I see a bucket running low on love and light
And the person's sad and lonely and their eyes don't shine so bright
I can make a difference if I smile and say hello
Funny but when I look again I see them start to glow

Chorus

We keep our eyes wide open as we're walking through our day
There are lots of opportunities we find along the way
To fill others' buckets, help their happiness to grow
And leave a trail of love and light behind us as we go

Chorus 2x
