

Circle of Light

Add a little light here, add a little light there

Bucket Filling as we go

Making sure that everybody

Is reminded and they know

They are special, they are welcome

They are worthy, they belong

We're all part of one big circle

Come on in and sing along

It's a circle of light, it's a circle of kindness

The more we give love to the world the more it can find us

When our buckets are full, we feel happy and strong

Shining so bright it only feels right to pass it along

Add a little light here, add a little love there

Bucket Fillers, you and I

There is room inside the circle

Come and stand here by my side

Reaching out, bringing in those who

Don't yet know that they belong

We're all part of one big circle

Come on in and sing along

It's a circle of light, it's a circle of kindness

The more we give love to the world the more it can find us

When our buckets are full we feel happy and strong

Shining so bright it only feels right to pass it along
